About Us

Welcome to Sharp Energy, Pocomoke City, MD and Belle Haven, VA

If you are looking for a propane company, it's important to look at dependability, service and value. Your propane company is an important player in keeping you and your home or business secure.

Our Pocomoke City and Belle Haven locations provide propane appliance service, installation and repairs. We have emergency service 24/7.

If you are considering buying, building, remodeling or retrofitting a home, Sharp Energy is prepared to work with you or your contractor. Gas for heating, water heating, gas fireplaces,

clothes drying, cooking, outdoor lighting, barbecue grills, fire pits, outdoor kitchens and pool heating are just some of the ways in which propane gas can enhance your project.

Have you considered installing a standby generator for your home or business? Get power, comfort and peace of mind when the power goes out.

These locations serve Somerset County, Worcester County, and Accomac County.

Delivery • Sales • Service

- 24-Hour Emergency Services
- Propane Appliance Sales, Installation and Service
- Wi-Fi Thermostat Sales and Installation
- Water Heater Sales and Installation
- Gas Piping
- And more...

Seasonal Safety Tips

1. Make sure you have an adequate propane supply.

2. Mark the location of your tank with a flag, stake or pole that is taller than average snowfall.

3. Make sure heating and appliances are running efficiently.

4. Create an emergency preparedness plan and supply kit and review it with everyone in your family.

5. Check your chimneys, flue pipes, vent connectors and propane tank for damage, blockage or debris caused by snow and ice.

6. Consider installing UL-listed propane gas detectors and CO detectors.

7. After a winter storm passes and it is safe, check the entire area for downed power lines, damaged gas lines or damage to your propane.
8. Never use a stove for space heating.

9. Never use outdoor propane appliances indoors or in enclosed areas particularly in the event of a power outage.

10. Exercise sound judgment.

Energy Saving Tips

- Save as much as 10% on energy costs by turning down your thermostat from 72 degrees to 68 degrees.

Reduce hot water temperatures by setting your water heater on “normal” or 120 degrees Fahrenheit. Water heating costs can be reduced up to 7-11%.

Inspect ductwork for air leakage and seal leaks with silver duct tape.

Replace air filters to increase airflow and energy use to save up to 5% on heating costs.
- Use appliances efficiently. Use cold water as much as possible to reduce energy use by 75%.

Clean lint traps in clothes dryers after each use.

Unplug unused appliances.

Winterize your windows by caulking non-moving parts and use weather stripping for moving parts.

Sharp 365 Q&A

Q: Does a gas fireplace need an annual inspection?

Yes! Every fireplace or insert should be inspected and cleaned annually. This is due to the hard work a fireplace puts in with each use, when heating your home. We recommend getting your fireplace checked each fall so that your unit is ready for use when those evenings start to get chilly.

Q: What Money Saving Program is best for me?

Sharp Energy's Annual ProCAP Protection Plan covers you all year long!

Get your delivery at any time of the year and never pay more than the capped price!

Your price is capped for an entire year!

- You are capped from September 1st through August 31st.
- Better Together! Sign up for our Easy Pay Budget Plan, you can spread your winter fuel bills out in equal payments throughout the entire year, which eliminates high winter bills!

The *Winter ProCAP Price Protection Plan* is still available! You can cap your price from September 1st through April 30th.

Smart Club: Has your propane usage been too low to take full advantage of Sharp's ProCAP Price Protection Plan? Now there is a program that allows you to cut your propane costs also. Designed specifically for customers who heat their houses with a fuel other than propane, your Smart Club membership entitles you to the following benefits:

- **Smart Pricing** — You'll pay Sharp Energy's lowest residential price for all of your propane needs.
- **Price Security** — You'll know that as a Sharp Energy Smart Club member, you're paying the very lowest residential price for your propane.
- **Automatic Delivery** — You'll never have to worry about calling for gas!

For just one annual fee, based on the size of your propane tank(s), you'll receive all of your propane for one year at our lowest residential price! To find out what your discount may be, call us today!

Tankless Gas Water Heaters

Sharp Energy is an Authorized Rinnai Pro Installer and Service Provider.

Tankless On Demand Gas Water Heaters Without Recirculation

Tankless on demand gas water heaters provide an endless supply of hot water. These models are energy efficient, as they only call for gas when there is a demand for hot water. There is no large water tank taking up space. These units are wall mounted and only about the size of a suitcase. This unit does require electricity at the site of the installation. Sharp Energy typically installs either Rinnai or American tankless brands. Sharp Energy is an Authorized Rinnai Pro Installer and Service Provider. Price includes standard installation.

Direct Vent Gas Wall Furnaces

Direct vent wall furnaces are an energy efficient heating option. These units are vented so they can be used as a supplemental or main heat product. Directly venting these units to an outside wall allows for a more convenient install option as there is no roof venting required.

Rinnai®

INDEPENDENT DEALER

Rinnai Direct Vent Gas Wall Furnace

These heating units modulate the usage of gas, optimizing energy efficiency. Rinnai's modulating technology produces the specific level of heat needed, responding to small temperature changes and resulting in a more consistent level of comfort. Constantly monitors room temperature, adjusts to increase or decrease fan speed, heat loss is minimal as they are directly vented with no ductwork. These units do require electric. Price includes standard installation.

---------------------------	----------	----------

*Sharp Energy recommends the installation of a carbon monoxide detector with any gas appliance. **Pricing includes standard installation excluding gas line. Pricing may vary based on installation. ***Pictures may vary from actual unit.

Propane Safety

Propane has a strong, unpleasant smell like rotten eggs. Propane manufacturers add the smell deliberately to help alert customers to propane leaks, which can create a safety hazard. If you smell a gas leak, take these safety steps from www.sharpenergy.com/propane-safety.

- **NO FLAMES OR SPARKS!** Immediately put out all smoking materials and other open flames. Do not operate lights, appliances, telephones or cell phones.
- **LEAVE THE AREA IMMEDIATELY!** Get everyone out of the building or area where you suspect gas is leaking.
- **SHUT OFF THE GAS.** Turn off the main gas supply valve on your propane tank if it is safe to do so. To close the valve, turn it to the right (clockwise). (Image 1)
- **REPORT THE LEAK.** From a neighbor's home or other nearby building away from the gas leak, call your propane retailer right away. If you can't reach your propane retailer, call 911 or your local fire department.
- **DO NOT RETURN TO THE BUILDING OR AREA** until your propane retailer, emergency responder or qualified service technician determines that it is safe.
- **GET YOUR SYSTEM CHECKED.** Before you attempt to use any of your propane appliances, your propane retailer's qualified service technician must check your entire system to ensure that it is leak-free.

If you are experiencing an emergency or concern, please contact us at

RECIPES

Playgroup Granola Bars

Ingredients

2 cups rolled oats
 ¾ cup packed brown sugar
 ½ cup wheat germ
 ¾ teaspoon ground cinnamon
 1 cup all-purpose flour
 ¾ cup raisins (Optional)
 ¾ teaspoon salt
 ½ cup honey
 1 egg, beaten
 ½ cup vegetable oil
 2 teaspoons vanilla extract

Directions

Preheat the oven to 350 degrees F (175 degrees C). Generously grease a 9x13 inch baking pan.

In a large bowl, mix together the oats, brown sugar, wheat germ, cinnamon, flour, raisins and salt. Make a well in the center, and pour in the honey, egg, oil and vanilla. Mix well using your hands. Pat the mixture evenly into the prepared pan.

Bake for 30 to 35 minutes in the preheated oven, until the bars begin to turn golden at the edges. Cool for 5 minutes, then cut into bars while still warm. Do not allow the bars to cool completely before cutting, or they will be too hard to cut.

Healthier Buffalo Chicken Dip

Ingredients

2 (10 ounce) cans natural chunk chicken, drained
 ¾ cup hot pepper sauce
 2 (8 ounce) packages Neufchatel cheese, softened
 1 cup light ranch dressing
 1 cup shredded reduced-fat Cheddar cheese, divided
 1 bunch celery, cleaned and cut into 4 inch pieces
 8 ounces multi-grain crackers

Directions

Heat chicken and hot pepper sauce in a skillet over medium heat, until heated through, about 5 minutes. Stir in Neufchatel cheese and ranch dressing. Cook and stir until well blended and warm, 5 to 7 minutes. Mix in half of the shredded Cheddar cheese, then transfer mixture to a slow cooker.

Sprinkle remaining Cheddar cheese over top, cover, and cook on Low until hot and bubbly, about 30 minutes. Serve with celery sticks and crackers.
