Propane Safety

Propane has a strong, unpleasant smell like rotten eggs. Propane manufacturers add the smell deliberately to help alert customers to propane leaks, which can create a safety hazard.

If you smell a gas leak, take these safety steps from fpuc.com/propane/safety:

- **NO FLAMES OR SPARKS!** Immediately put out all smoking materials and other open flames. Do not operate lights, appliances, telephones or cell phones.
- **LEAVE THE AREA IMMEDIATELY!** Get everyone out of the building or area where you suspect gas is leaking.
- **SHUT OFF THE GAS.** Turn off the main gas supply valve on your propane tank if it is safe to do so. To close the valve, turn it to the right (clockwise). (See *IMAGE 1*)
- **REPORT THE LEAK.** From a neighbor's home or other nearby building away from the gas leak, call your propane retailer right away. If you can't reach your propane retailer, call 911 or your local fire department.

IMAGE 1: Areas on tanks where shut off valves are located.

- **DO NOT RETURN TO THE BUILDING OR AREA** until your propane retailer, emergency responder or qualified service technician determines that it is safe.
- **GET YOUR SYSTEM CHECKED.** Before you attempt to use any of your propane appliances, your propane retailer's qualified service technician must check your entire system to ensure that it is leak-free.
